

Laser Tattoo Removal:

Perception versus Reality

Tattoos seem to be everywhere, but what is the real incidence of tattoos among Americans, and how does tattoo regret translate into a market opportunity for laser tattoo removal? How do you address this market opportunity, and what do the latest generation of 'picosecond lasers' bring to the table?

enLIGHTEN™
LASER TATTOO REMOVAL AND BPL

Educational Webinar

Thurs Sept 17

4:00 PM - 5:00 PM PT / 7:00 PM - 8:00 PM ET

As the owner of four picosecond laser systems and experienced in treating over 10,000 tattoos over ten years, Dr. Jill Lezaic brings a no-nonsense real-world view of the laser tattoo removal market opportunity, and the technology that is best suited to address it. Dr. Lezaic has used—and owned—practically every laser for tattoo removal, and is an expert in every facet of building a successful laser tattoo removal practice.

Topics in this live webinar will include:

- Perception versus reality of the laser tattoo removal market opportunity
- Technology overview: which lasers, which wavelengths, and which pulse durations?
- Adding laser tattoo removal to your practice—real-world advice and guidance
